Hi Paul,

Per our discussion, Camrosa offers the following comments:

The Camrosa Water District is currently in the process of developing a Facilities Master Plan that will identify a suite of both short-term and long-term projects located within the City. The Plan is expected to be completed in August 2023, and hopefully finalized and adopted towards the end of the year. Currently, the following projects located within the City limits are on our books and expected to be completed within the next 5-years.

- 24" waterline replacement in Santa Rosa Road – Replace/upsized existing waterline in Santa Rosa Road, between Upland and San Raphael Way.
- Repair Sewer Hotspots – Various locations
- Valve Replacement – Various locations

Please let me know if you have any questions or need more information.

Thanks

Terry Curson, P.E.
District Engineer
